

Playing Cubism

Gameplay: The goal of Cubism is to challenge your mind by assembling complex shapes out of colorful blocks.

Like this:

Background:

Puzzles in general improve things like problem-solving skills, mood, and memory. Disassembly puzzles are hands-on, tactile puzzles that involve interacting with different components, usually in a specific order, to take apart an object or access a specific compartment containing a prize. Our assembly puzzles are these but done in reverse.

How to play:

1. Get comfortable and turn on the VR set, put your headset on and put a controller in each hand. You can play both sitting and standing.

IF YOU PLAY STANDING, MAKE SURE THE CABLES ARE BEHIND YOU SO YOU DON'T TRIP!!

2. Select the Cubism game.
3. Use the trigger and grab the green piece with any hand.
4. Place the piece in the highlighted area.
5. Enter Volume 1 using the trigger.
6. Select difficulty and puzzle.
7. Use the trigger to grab any piece.
8. Place the part in the highlighted area.
9. Use your hands to manipulate pieces and your viewing angle of the area.
10. Change angles and piece placement until you have solved the puzzle!

ENJOY!!!

Cubism has up to 90 levels to challenge your brain, all with different shaped pieces and their own unique solution. Today, we'll be asking you to solve a select few of them. Happy puzzling!
